# Colorado Forensic Support Team (FST) Overview

---

# Colorado FST Overview

**Program Mission:** To ensure an effective competency system, Forensic Support Teams strategically coordinate care and communicate the needs of the clients to all stakeholders.

**Program Operations:** Through interaction, observation, and coordination, Forensic Navigators:

- Assist state mental health hospitals with managing and organizing inpatient restoration admissions.
- Identify and refer individuals who might be better suited for outpatient restoration services.
- Ensure care coordination and communication for individuals returning to the jail from inpatient restoration.
- If a client is found to be unlikely to be restored to competency, and their charges are dismissed, FST provides referrals, resources, and services to help facilitate successful reentry into the community.

# Colorado FST Outcomes

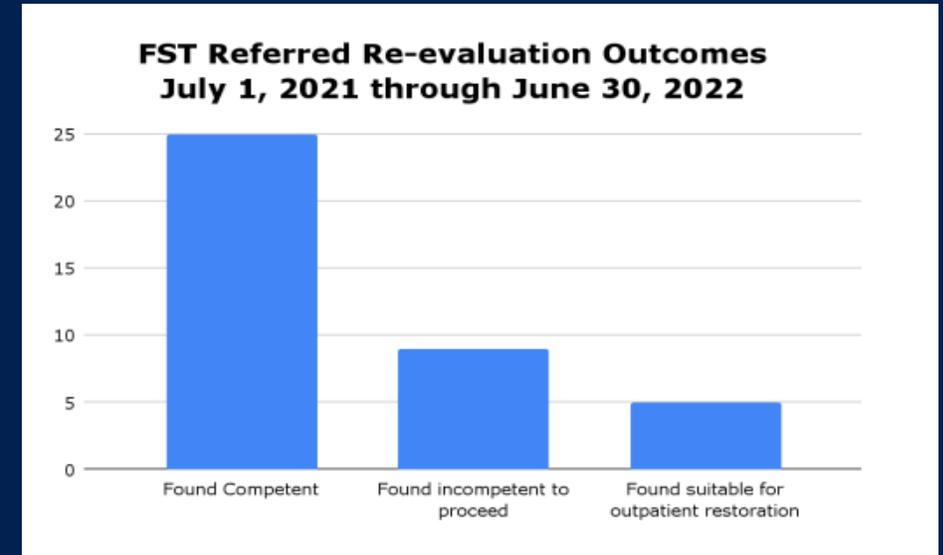

**1,284** Jail  
Days Saved  
(7/2021 – 6/2022)

TEXAS  
Health and Human  
Services

*This table reflects the total number of individuals who were transitioned to outpatient services and, of those, the total number who returned to jail.*

*This table reflects the number of individuals referred by forensic navigators for competency re-evaluation (39 total) and the outcomes of the re-evaluations.*

---

# Vision

---

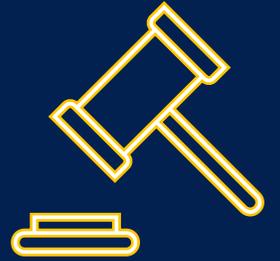

Forensic Support Teams (FST) serve as coordination and navigation entities for people found incompetent to stand trial (IST) when competency restoration services have been ordered by the court.

**TEXAS**  
Health and Human  
Services

# Target Population

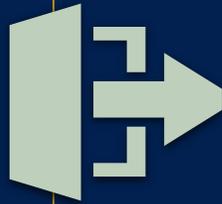

- Individuals **currently on the waitlist** for inpatient competency restoration (ICR) services **or returned** from a competency restoration program, including outpatient competency restoration (OCR) and jail-based competency restoration (JBCR), and awaiting adjudication.
- Individuals a court has determined **not restored to competency** after receipt of inpatient, OCR, or JBCR who are then committed to inpatient or outpatient services by the criminal court under Code of Criminal Procedure Article **46B.102** or against whom criminal charges have been **dismissed**.

TEXAS  
Health and Human  
Services

# Program Goals

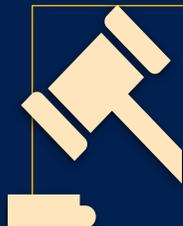

FSTs work with the Local Mental Health Authority (LMHA) or Local Behavioral Health Authority (LBHA), courts, jails, state hospitals, state-contracted facilities, and facility administration to coordinate care and communicate client needs.

**Divert** people into outpatient competency restoration, jail-based competency restoration, or other appropriate services and service settings, if available.

**Identify** people who may have restored to trial competency while awaiting restoration services and coordinating trial competency reevaluations.

**Coordinate** prompt access to available and appropriate behavioral health and medical care for people found IST prior to or after receiving services through an inpatient, outpatient or jail-based CR program.

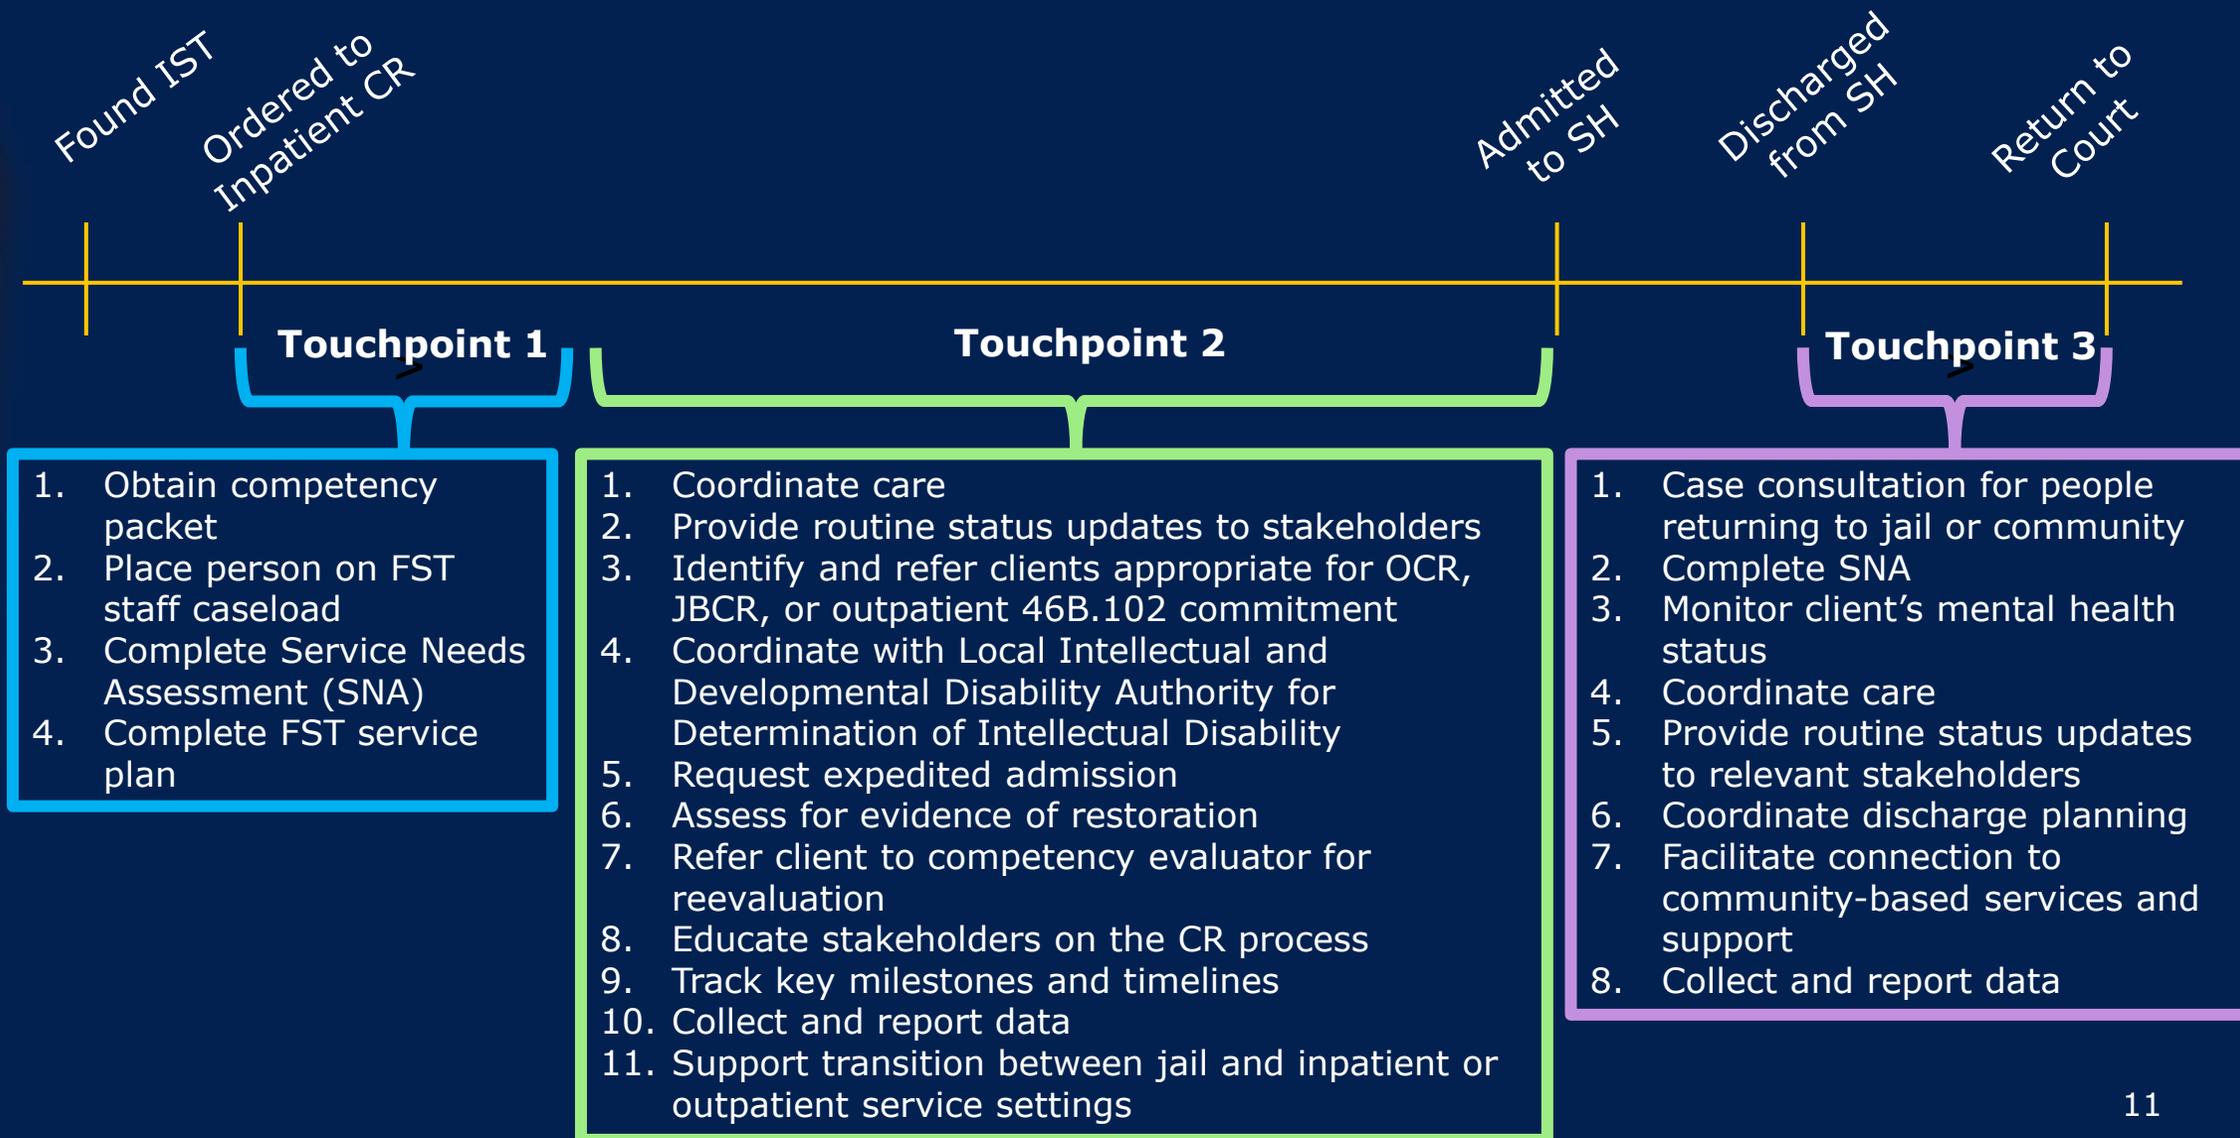

**Collaborate** with all stakeholders on competency restoration services, court processes, and the individual's clinical and non-clinical needs.

# Program Activities

# Performance Reporting

## Client data:

- Treatment history
- Treatment engagement
- Co-occurring disorders such as Traumatic Brain Injury, Neurocognitive Disorder, Substance Use Disorder, Intellectual Disability
- Housing status
- Charge type and degree
- FST assessment outcomes
- Key dates: date of arrest, order, admission to a CR program, etc.

## Program Data:

- People served
- Expedited admissions
- OCR/JBCR/outpatient .102 referrals
- Inpatient diversions/waitlist reductions
- Reevaluations and outcomes
- Narrative: Use of evidence-based practices
- Narrative: Recidivism rates and trends
- Narrative: Successes and challenges
